

Higher Education Institution (name in original language and in English)	Universitat Obertat de Catalunya (Open University of Catalunya)
Country	Spain
State/Province (where applicable)	Barcelona
Name of the Programme (name in original language and in English)	Ingeniería Informática [Computing Engineering]
Degree Awarded	Bachelor
Qualification Level (First Cycle / Second Cycle)	First cycle
Programme Objectives; Profile (where applicable)	The <u>Bachelor's programme in Computing Engineering</u> aims at forming experts in computing who are able to adapt to emerging technologies and changing environments. The degree provides a general training that enables students to acquire the knowledge and skills necessary to work in a wide range of areas.
Programme Duration (Semesters; in case of "terms" of different length, indicate them and the equivalent in semesters)	8 Semesters (standard best-case full period)
Total Number of ECTS Credits Awarded	240 ECTS
Brief Description of the Programme	<p>Students can specialize in one of the five specializations proposed by the Association for Computing Machinery (ACM), in collaboration with the Institute of Electrical and Electronics Engineers (IEEE) and the Association for Information Systems (AIS):</p> <ul style="list-style-type: none"> • Computer Engineering: This specialization focuses on the theory, principles and practices related to networking, security, operating systems, distributed systems and computer architectures. • Software engineering: This specialization revolves around software development methodologies, and addresses engineering issues related to efficiency, reliability, maintenance, etc., as applied to software artefacts. • Computer science: This specialization focuses on the theoretical foundations of Computing, as well as on those problems to be solved by intelligent systems. • Information systems: This specialization explores the role of IT and IT-based information systems within organizations, and the strategic and functional management of IT and information systems. • Information Technology: This specialization deals with the technological aspects of IT within companies and organizations.
Examples of Very Good Practice (where applicable)	The transition from standard to virtual learning – spearheading this direction, the very dynamic and dedicated team and the open discussion climate - was found to be very positive, as well as the delivery of the curriculum, the imaginative use of technology to enable learning as well as the integration of tutors with curriculum design and delivery.

Accredited without / with Adjustment Requirements	fulfilled
Adjustment Requirements (where applicable)	Recommendations (to be reviewed at re-accreditation) <ol style="list-style-type: none"> 1. Improve process for revising course material 2. Enhance the role of the student representative body 3. Provide degree specific Diploma Supplements (in English)
Accredited by (agency, country)	EQANIE – European Quality Assurance Network in Informatics Education
Accredited (from ... to ...)	From 19 November 2012 to 31 December 2013
