

Higher Education Institution (name in original language and in English)	Universitat Obertat de Catalunya (Open University of Catalunya)
Country	Spain
State/Province (where applicable)	Barcelona
Name of the Programme (name in original language and in English)	Ingeniería Informática [Computing Engineering]
Degree Awarded	Master
Qualification Level (First Cycle / Second Cycle)	Second cycle
Programme Objectives; Profile (where applicable)	The objective of the <u>Master's programme in Computing Engineering</u> is to provide the competences, knowledge and skills necessary to develop a highly qualified professional activity in the area of Computing, in ICT project and team management.
Programme Duration (Semesters; in case of "terms" of different length, indicate them and the equivalent in semesters)	3 Semesters
Total Number of ECTS Credits Awarded	78 ECTS
Brief Description of the Programme	This degree complements and extends the training offered in the corresponding <u>Bachelor's programme</u> , with a greater emphasis placed on working in large and multidisciplinary contexts, on the ability to adapt and innovate by applying knowledge to new environments, on the continuous updating of knowledge, on technology integration and on IT and information systems planning and strategic management. The Master's programme offers students an advanced knowledge on information technologies that enables them to assume a greater degree of specialization. According to this programme, graduates of the <u>Master's programme in Computing Engineering</u> should be able to develop their career in different areas of Computing, according to current quality standards and legal regulations. In their work, they are expected to be able to select the appropriate knowledge and to apply it to each situation, to integrate knowledge from different sources to obtain a solution, to use innovation to solve new problems and to continuously update their knowledge to cope with the constant evolution of IT. They must also be able to take responsibility in the project management of multidisciplinary teams in all areas of Computing.
Examples of Very Good Practice (where applicable)	The transition from standard to virtual learning – spearheading this direction, the very dynamic and dedicated team and the open discussion climate - was found to be very positive, as well as the delivery of the curriculum, the imaginative use of technology to enable learning as well as the integration of tutors with curriculum design and delivery.
Accredited without / with Adjustment Requirements	fulfilled

Adjustment Requirements (where applicable)	Recommendations (to be reviewed at re-accreditation) <ol style="list-style-type: none"> 1. Improve process for revising course material 2. Enhance the role of the student representative body 3. Provide degree specific Diploma Supplements (in English)
Accredited by (agency, country)	EQANIE – European Quality Assurance Network in Informatics Education
Accredited (from ... to ...)	From 19 November 2012 to 31 December 2017
